

SPORT Discus is considered to be the world's leading sport, fitness and sports medicine bibliographic database. Universities, hospitals and sport training centres from around the world subscribe to SPORT Discus.

Source: Sport Information Resource Centre

SPORTDiscus is a unique resource for both practical and research literature on sport, physical fitness and physical education topics. Records cover sports medicine, exercise physiology, biomechanics, psychology, training, coaching, physical education and fitness, and other sport- and fitness-related topics.

SPORTDiscus also provides comprehensive indexing of the Microform Publications collection of dissertations and theses of the International Institute for Sport and Human Performance. Also included are all citations from the previous Sport & Leisure bibliographic database of SIRLS, covering the research literature for the social and psychological aspects of sport and leisure, including play, games and dance. Other databases include Heracles, Atlantes, Olympic Museum Catalog and AAFLA. Coverage includes theses and monographs from 1609 to present; and selected topics from 1859 to present.
